

Protect your baby from scalds & burns

Water Temperature

- ✓ Set water heater to 120°F degrees or lower

- ✓ Test water temperature with your wrist or elbow first
- ✓ Never leave your child alone

Cooking

- ✓ Keep HOT soups & liquids away from babies & toddlers

Instant soup can cause severe burns.

They tip easily & noodles stick to the skin, causing a severe burn.

- ✓ Kids-free zone" around stove/oven
- ✓ Never hold anything hot when carrying a baby
- ✓ Do not heat formula/milk in microwave
- ✓ Do not allow young children to use microwave
